

TEJASVI KUMAR

MERN Stack Developer

+91 6205731150 | tejasvibihari2000@gmail.com | Sector 73, Noida, UP | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

CAREER SUMMARY

Results-driven Full-Stack Developer with hands-on experience building production-grade SaaS platforms and e-commerce systems using the MERN stack (MongoDB, Express.js, React.js, Node.js). Demonstrated ability to architect multi-tenant applications, design RESTful APIs, and deliver end-to-end features independently — from database schema to React UI. Experienced in D3.js data visualization, JWT/token-based authentication, and performance optimization. Completed MCA while actively shipping real-world products used by paying clients.

TECHNICAL SKILLS

- **Frontend:** HTML, CSS, Javascript, React.js, Redux, Tailwind CSS
- **Backend:** Node.js, Express.js, MongoDB
- **AI & Automation:** OpenAI API
- **Tools :** Git, VPS Hosting, Postman
- **Other:** DBMS, REST APIs, JSON

EXPERIENCE

Repairst Moto | Full-Stack Developer (March 2025 – June 2026)

- Built a full-stack MERN application to manage **500+ customer service bookings** and technician workflows.
- Implemented **JWT-based authentication** with admin/user roles, enhancing security and access control.
- Automated invoice creation, cutting manual processing time by **70%** and reducing billing errors by **90%**.
- Improved service tracking efficiency, leading to a **25% faster turnaround** in customer requests.

PROJECTS

Repairst Moto – Web Application (2026) [repairstmoto.in](#)

- Developed and maintained a full-stack motorcycle service management platform using the **MERN stack**, improving service booking and workshop operations.
- Built responsive web interfaces, integrated **REST APIs**, and optimized application performance to deliver a seamless user experience across devices.
- Implemented secure authentication, **role-based access control**, and database management while collaborating in an Agile development environment.

Library Sathi -SaaS Application (2025) [librarysathi.in](#)

- **Built and scaled Library Sathi** (librarysathi.in), a multi-tenant SaaS library management platform featuring student admission flows, token-based authentication, seat/locker assignment logic, and branded transactional email systems using React, Node.js/Express, and MongoDB.
- Built a **dynamic seat availability and booking screen** with real-time shift selection, resolving race conditions during high-demand booking windows for a platform serving **300+ active students**.
- Built an **admin panel** with live billing calculations, a multi-section save architecture, and a Hard Edit/DiffModal review flow for accurate student account management.
- Integrated **Razorpay payments** with an immutable payment ledger and auto-incrementing invoice generation; currently leading conversion of the platform into a **React Native mobile app** covering admission, payments, and seat/shift booking.
- Built a **pre-admission student management module** with a multi-step React modal and a **token-based password reset flow** for students, improving onboarding and account recovery.

AI-Powered Chrome Extension (2025) [GitHub Repo](#)

- Designed an **AI-driven Chrome Extension** integrating **ChatGPT** and **Gemini APIs** for content summarization.
- Enabled **real-time webpage data scraping** with ad filtering, improving data relevance by **85%**.
- Added **interactive D3.js visualizations**, helping users analyze content structures effectively.
- Achieved a **40% faster summarization response** by optimizing data handling and caching logic.

EDUCATION

MASTER'S DEGREE | Master of Computer Application | IIMT Group of College | CGPA: 8.24 2024 – 2026

BACHELOR'S DEGREE | B.Sc. (Information Technology) | Suresh Gyan Vihar University | CGPA: 8.15 2021 – 2024

CERTIFICATIONS & ACHIEVEMENTS

- National-Level Hackathon Participant – HackIndia 2025: Represented college team in India's national hackathon, developing an AI-integrated MERN solution within 36 hours under real-world problem constraints.
- MERN Stack Development – Udemy (2024)
- System Design Fundamentals – Udemy (2025)
